

ALBA STRONGLY CONDEMNS U.S. ATTACK ON IRAN

The countries of the Bolivarian Alliance for the Peoples of Our America (ALBA) condemn in the strongest terms the criminal military attack perpetrated by the U.S. government against peaceful civilian and nuclear facilities in the Islamic Republic of Iran, particularly the Fordow, Natanz and Isfahan sites.

This flagrant aggression violates the Charter of the United Nations, International Law and the most elementary principles of peaceful coexistence, constituting an inadmissible warfare act that endangers global security and further destabilizes the region. It violates the international nuclear safety regime and IAEA standards and safeguards.

ALBA expresses its firm and unwavering solidarity with the Iranian people, victims once again of the warmongering and interventionist policy of the United States, which continues to act with impunity, disregarding the right to self-determination of peoples and threatening world peace.

We demand the immediate cessation of these illegal and unilateral actions, and call upon the international community to express its firm opposition to this unacceptable attack on Iran's sovereignty and territorial integrity.

ALBA reaffirms its steadfast commitment to peace, justice, respect for International Law and peaceful coexistence among nations, and warns of the serious consequences that this dangerous military escalation could have for global stability.
